---

pollViz

*Visualizing Poll Data*

---

## Description

This function allows you to visualize the data in pollVizR. Returns a ggplot with margins of error embedded.

## Usage

```
pollViz(fake, cI = 95, plotTitle, wes = F)
```

## Arguments

fake	Your dataframe returned from pollImport.
cI	*Integer* representing the confidence interval for the y-axis label. Defaults to 95.
plotTitle	String representing the title. No default.
wes	FUTURE. You may pass on a string representing a Wes Anderson palette from the package “wesanderson” here. FUTURE

## Examples

```
pollViz(fake, cI = 85, plotTitle = "Fake data are cool")
```
